Pleased in creativity, proficient in manufacturing

A . Original and creative intelligent auto-backlight

The backlight changes automatically according to outside light, so indicator screen is clear in any circumstance.

B . Pallet scales' specialized indicator

This indicator is developed specially for pallet scales. The large screen provides people with convenience to realize any beautiful design. The housing with high strength makes sure indicator will be undamaged in use.

C . New loadcell

This loadcell deforms plastically together with the body, so accuracy error caused by twisting force is avoided.

D . High-intensive truck leg

Structural mechanics is applied in this item of truck leg, so strength is increased without any material increase.

E . Leg's balance adjustment

This adjustable bolt can adjust two legs' balance quickly and it is more convenient to be disassembled for repairs.

F . Foot brake

This brake device raises this product's stability greatly, which will be indispensable in the future.
